CAREER OBJECTIVE

To achieve competency in web development by growing vertically in a challenging environment enhancing my technical and analytical skills and there by aiding in the growth of organization.

PROFESSIONAL EXPERIENCE

Caroobi

Software Engineer, Jan 2019 – Mar 2020

- Worked on Caroobi's customer portal. Rolled out its first version on production.
- Simultaneously worked on another project (Mechanic Interface). Integrated 3rd party APIs in an optimal way on the frontend.
- Created a whole new user funnel removing the previous one, in only a week and rolled it to production.
- Integrated Google tag manager on the portals for tracking. Also verified the data loss by GTM/Snowplow by creating a separate lambda function and comparing the data. Automated this task by creating a node program which would create an excel file for a given day's data.
- Coordinated with the project managers for different tasks, estimated the deadlines and took responsibilities of the tasks (both pre and post-production).

Wisitech InfoSolutions

Senior Frontend Developer, Sept 2018 – Jan 2019

- Lead the front-end development for a huge website having:
 - Social features as in Facebook.
 - E-commerce features as in Amazon.
 - Events booking features as in BookMyShow.
- Coordinate with the different teams to ensure the smooth development process.
- Analyze the requirements and hence create the basic structure of different modules.
- Create the reusable components, directives and pipes and integrating them.
- Make the app compatible with different browsers and different screens.
- Assess the UI requirements and accordingly estimate the deadlines and adhering to them.

Accenture Solutions Pvt. Ltd.

Application Development Analyst, Jan 2017 – Aug 2018

- Modify existing web application to correct errors or to upgrade interfaces and improve performance.
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards and is compatible with browsers, devices, or operating systems.
- Debugging the code efficiently to find the root cause of the defects and resolving them.
- Develop or validate test routines and schedules to ensure that test cases mimic external interfaces and address all browser and device types.
- Write test cases for the existing and new code to meet the industry standards.
- Training the new joiners and giving them the overview of Angular and front-end development and the project
- Analyzing the User Stories and estimating the efforts needed to complete them.

EXL Services, Noida**Intern, Summer 2014**
